

polycom® by thyssenkrupp Polysius

# Smarter Mining Starts Here!

Boost material flow without expanding your plant

Mixed gear? No problem.

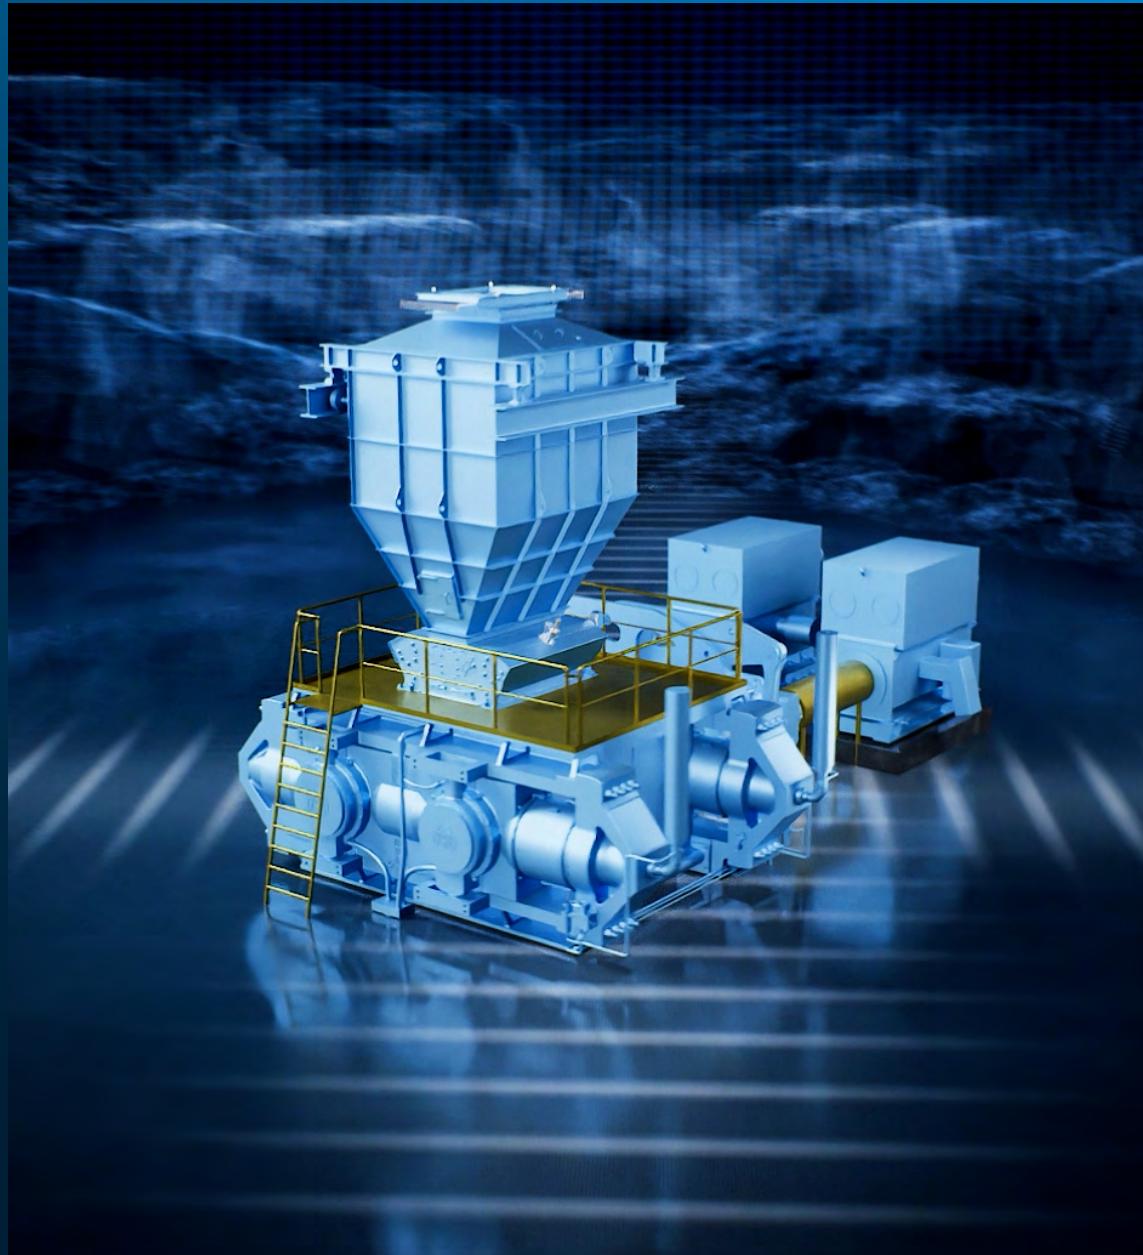

engineering.tomorrow.together.

One partner. One plan.

# Key features

- **Sliding Bearings** for roughest environments
- **Higher Lubrication Gap** does accept bigger contamination particles
- **More throughput** delivers maximum production
- **Higher Pressure** to grind everything
- **Smart Feed Unit** for more uptime
- **Smart Gide Plates** for a saver equipment
- **Simplified Maintenance** by increasing accessibility
- **Lower Total Cost of Ownership** decrease of spare parts- and consumable- consumption

- » **Delivers high production efficiency**
  - up to 50% more throughput\*
- » **Retrofittable to plants in Operation**
  - for fastest production increase

\*compared to the previous polycom® model
