

Environmental Policy

thyssenkrupp Estaleiro Brasil Sul and the Tamandaré Class Frigates Program, while seeking for continual improvement of its environmental management system, declare the Top Management commitment to make resources available for actions aimed at sustainability. Hereby, it ensures that it is committed to the following principles:

- Prevention of pollution and protection of the environment;
- Compliance with legal, regulatory and other requirements applied to our activities;
- The promotion of continuous improvement of the environmental management system by improving activities, processes, and the transparency of our environmental performance to stakeholders;
- The rational use of natural resources, the improvement of the production process and the adequate management of its waste and wastewater, reducing environmental impacts;
- Adequate preparation and responsibility for emergency situations, in order to prevent and minimize the impacts;
- Promoting employee awareness and involvement with environmental and responsible actions;
- The search for suppliers and contractual partners who are committed to their responsibilities towards the environment;
- Respect for corporate integrity in its actions, through the Compliance guidelines.

The Top Management ensures that its objectives and goals are met and that the principles of its Environmental Policy are implemented and maintained.
