TRAININGS

Know what to do and how to do it

Due to the high safety requirements and complexity, the components require qualified personnel who are continuously trained on state-of-the-art aspects to guarantee smooth operation and minimize downtimes.

Our Services at a Glance

Training session at site

- From one to five days trainings
- Theoretical as well hands-on in our maintenance academy
- Content: structure and function of components, machines and plants, operation, replacement of parts, special tool usage, safety instructions, failure finding, testing, procedures, "good to know" tips, experience exchange
- Introduction of new systems and practises

Training session at UHPT

- In addition – learn about manufacturing of parts
- Discussion with the equipment specialists and learn the tricks to do something
- Experience exchange with the whole team and learn the tricks to do maintenance in the best way
